Recommended and verified updated labels:

New Member	Become a Member	New
Returning Member	Membership Renewal	Renew
Qualified Member	Activate Membership	Claim

The recommended card labels use clearer, action-oriented language that improves both user understanding and consistency with the corresponding action buttons. We recommend updating the current test server labels to these approved versions to ensure alignment with the change request and to enhance the overall user experience.

Overall, the implementations for the requested changes have been successfully deployed and verified on the test server. All items function as expected and meet the specified requirements with the exception of item #5. While editing of PRC license records has been disabled as required, members are still able to remove these records, which is not aligned with the intended restrictions. We kindly request that this capability be removed to prevent removal of PRC license records by members.

For item #4, we note the absence of user feedback when attempting to interact with the disabled chapter selection during renewal. Implementing a feedback message would enhance usability.

We appreciate your efforts and look forward to your updates on the outstanding issues. Once addressed, we will proceed with the final round of testing.

Thank you for your continued support.
